## SUMMARY

MSc Information Technology student with strong fundamentals in frontend development, specializing in JavaScript and React. Actively seeking a Frontend / React Developer Internship to build scalable, user-friendly web applications, gain real-world industry experience, and progress toward a Full-Stack Developer role.

## PROJECTS

### React Task Manager Application

- Developed a responsive task management web application with full CRUD functionality using React Hooks for efficient state management and local storage for data persistence.
- Technologies: React.js, JavaScript (ES6+), React Hooks, HTML5, CSS3, Local Storage

### API-Based Web Application (Weather / Movies)

- Created a dynamic frontend application that fetches and displays real-time data from third-party APIs with search, asynchronous handling, and error management for a smooth user experience.
- Technologies: JavaScript, REST APIs, Fetch API, JSON, HTML5, CSS3

### Emergency SOS Vehicle Detection System

- Built an IoT-based system to detect vehicle accidents and automatically send SOS alerts with real-time GPS location using sensor data.
- Technologies: Arduino/ESP32 (concept), Accelerometer & Vibration Sensors, GPS Module, Embedded C, IoT

### Personal Portfolio Website (Ongoing)

- Developing a professional, responsive portfolio website to showcase technical skills, academic projects, and contact details. Planned deployment using cloud-based platforms.
- Technologies: HTML5, CSS3, JavaScript, Responsive Design, GitHub Pages

## EDUCATION

### MSc in Information Technology

2022 – 2026

Silver Oak University

- CGPA: 8.95 (Semester VI)
- CGPA: 8.71 (Semester VII)

## TECHNICAL SKILLS

- JavaScript (ES6+), HTML5, CSS3
- React.js (Learning), DOM Manipulation
- OOPS, Basic Data Structures
- Git, GitHub, VS Code
- Familiar with AI tools for productivity
